

ROOKEE

Seating Products

Seating Excellence at Work

There were many objects in our childhood that we quickly outgrew, be it toys, clothes, and even our beds. As a parent, you are faced with the constant need to keep up with your child's development needs. ROOKEE aims to live in your household a little bit longer, as it becomes your child's growing companion from preschool to adolescence.

In this day and age of fast moving and disposable goods, ROOKEE adapts to your child's growing body, extending the life and usability of the product.

Back Shell

White injection molded polypropylene (100% recyclable). Adjustable for 7 positions.

Seat Shell

White injection molded polypropylene (100% recyclable). Seat height is adjustable by 110mm.

Height Adjustment

Adjustability

The key feature that ROOKEE boasts is its ability to adjust the back to 7 different positions. Each adjustment changes both the back height and seat depth simultaneously; accommodating different size users. This one chair can be used by different aged siblings by simply pressing the sliding handles on the armrest.

The footrest can swivel out of the way to accommodate larger users. The ideal user range is from 4 to 14 years old, and height from 1.1 to 1.6 meters. This corresponds to the EN 1729 standard Sizemarks 2 to 5.

Flexibility

Dust bunnies have nowhere to hide! Both the back and seat pad can easily be removed for that thorough cleaning of areas where dirt gets trapped. Furthermore the upholstery can be replaced in case little Picasso creates "masterpieces" on the upholstery,

Versatile enough to withstand growing pains at home or school.
